

“DAY FOR YEAR” INTERPRETATIONS HELD

Although the seventy weeks had been understood as weeks of years (a day representing a year), it was not until Joachim of Flores that the day for year principle was applied to the larger symbolic prophetic time period of 1260 days by a Christian. (Jewish expositors had previously applied the year-for-day principle.) [Joachim, Concordia, fol. 127 r, v.] This principle was followed by others as shown in the chart below.
